

MUHAMMAD AHSAN MERN STACK DEVELOPER

Lahore, Pakistan | +92-303-5251358

ahsan.dev.404@gmail.com | [LinkedIn](#) | [Github](#)

I am a Full Stack Web Developer with over 4 years of experience, specializing in both backend development and DevOps. Proficient in JavaScript, Express.js, MongoDB, and PostgreSQL, I build scalable web applications and manage cloud infrastructure with AWS and Docker. I also have expertise in frontend technologies like React, Next.js, and Tailwind CSS. Focused on delivering high-quality, maintainable solutions, I thrive in collaborative environments to meet both technical and business goals.

Education

COMSATS University Islamabad Lahore, Pakistan

Feb 2020 – Jan 2024

BSCS -Bachelor's in science in Computer Science

Core Skills

Sequelize, MySQL, PostgreSQL, Redis, NoSQL Databases like CouchDB and Cassandra, MongoDB, SQLite, Mongoose

Project Management:

Agile Development, JIRA, Asana, Trello, Slack, Microsoft Teams

Testing:

Debug software tools like Cypress and Jest, Event Sourcing, ESLint, Troubleshooting, PHPUnit Testing, PHPStan (max level), Rector

Soft Skills:

Disciplined, Well-Organized, Collaboration Skills, Teamwork, Ability to work independently, Communication Skills

Programming Languages:

JavaScript, TypeScript, Python, Java

Work Experience**DEVWOLFZ**

Software Engineer

Oct 2024 - Present | Remote | United States

- Honed skills in full-stack development with Next.js, Node.js, and Express.js
 - Expertise in building scalable applications using PostgreSQL, MongoDB, and AWS
 - Contributed to Devwolfz's mission of delivering cutting-edge, cloud-native solutions ●
- Worked extensively with DevOps tools, Docker, and CI/CD pipelines for streamlined development
- Leveraged GitHub for version control and collaborative software development

Tekvill

Software Engineer

Jul 2022 - Sep 2024 | Hybrid | Lahore

- Honed skills in MERN stack development, specializing in Next.js
- Ventured into AI applications with OpenAI
- Crafted robust solutions for web and mobile platforms using MongoDB, Express.js, React.js, and Node.js.
- Contributed to Tekvill's mission of delivering cutting-edge software solutions

Rubik's Solution

Associate Software Engineer

Jul 2020 - Jun 2022 | Hybrid | Lahore

- Leveraged expertise in MERN stack development, encompassing MongoDB, Express.js, React.js, and Node.js
- Focused on both web and mobile platforms
- Delivered robust and innovative solutions for the company's projects ● Collaborated with a talented team to drive the company's success

IVT Technologies

Internship Trainee

Feb 2020 – Jul 2020 | On-site | Lahore

- Crafted captivating interfaces and conquered bugs during the MERN Stack Internship
- Embraced the power of teamwork
- Ignited passion for web development

Projects

ProspectX - All-in-One Software Solution for Real Estate Wholesalers and Investors

Description: Developed a powerful and user-friendly platform tailored for Real Estate Wholesalers and Investors to streamline deal management, enhance operational efficiency, and enable business growth.

Tools: React.js, Tailwind CSS, Node.js, MongoDB, AWS, Docker, REST APIs

Features:

- Designed a modern and responsive user interface using React.js and Tailwind CSS to ensure seamless usability for real estate professionals.
- Built a scalable and secure backend with Node.js and MongoDB to manage deals, workflows, and user data effectively.
- Implemented RESTful APIs to maintain smooth communication between the client and server, ensuring optimal performance.
- Deployed on AWS infrastructure using Docker containers, enabling high availability, scalability, and consistent updates through CI/CD pipelines.

PrintMeAll - Corporate Identity Branding

Description: Created a dynamic platform for customized printing and packaging solutions across the UAE, simplifying order management and delivery processes.

Tools: Next.js, Redux.js, Tailwind CSS, Nest.js, PostgreSQL, AWS, Docker

Features:

- Designed a sleek and responsive frontend using Next.js and Tailwind CSS for seamless user experience.
- Implemented backend solutions with Nest.js and PostgreSQL for managing orders, product catalogs, and payment processing.
- Optimized infrastructure with AWS and Docker for efficient performance and rapid feature updates.

Link: <https://printmeall.ae>

MyHomePathway - Home Loan Platform

Description: Built an advanced platform to streamline the home loan process, connecting lenders and borrowers with an intuitive and efficient system.

Tools: Next.js, Tailwind CSS, Nest.js, PostgreSQL, AWS, Docker

Features:

- Created a responsive and SEO-friendly user interface using Next.js and Tailwind CSS.
- Developed backend functionalities for loan applications, credit assessments, and transaction management using Nest.js and PostgreSQL.
- Implemented scalable deployments with AWS and Docker, ensuring consistent performance and availability.
